PROFESSIONAL SUMMARY

A highly motivated and analytical Software Engineer with a solid foundation in **Applied Mathematics and Systems Programming**. Possesses a unique blend of technical expertise, creative passion for **UI/UX design (including 3D modeling in Blender)**, and proven leadership skills developed through managing fast-paced logistics and team-leading environments. Self-driven and resilient individual who transitioned into modern software engineering, successfully building and deploying over **10 complete web and mobile projects**. Specialized in creating clean, performant, and deeply interactive digital experiences using **TypeScript, React, Next.js, and React Native (Expo)**. Seeking a challenging full-time position within an innovative international tech team.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5 (Canvas), CSS3 (Nesting)
- **Frameworks & Libraries:** React.js, Next.js, React Native, Expo Ecosystem, Bootstrap 5
- **Architecture & Runtimes:** Node.js, Bun Runtime, OOP (Object-Oriented Programming), BEM Methodology
- **Tools & Build Systems:** Git Version Control, Vite, Turbopack (Rust), REST APIs, LocalStorage API
- **Creative Stack:** Blender 3D (Modeling, Motion Design, Spatial Awareness)

RECENT PROJECTS (Portfolio Showcase)

All projects are fully functional, responsive, and available on GitHub with active live deployments.

React Native Neumorphic Messenger (Mobile App)

- Developed a secure, cross-platform mobile chat application using **React Native** and the **Expo Ecosystem**.
- Designed a high-end, custom tactical neumorphic user interface ensuring pixel-perfect layout and fluid transitions.
- Implemented robust state management to handle dynamic real-time data flow and instant message caching.

Next.js E-Commerce Game Store (*Web Application*)

- Built a highly performant game store web application leveraging **Next.js** and fast **Turbopack** build tools.
- Engineered sophisticated front-end data filtering logic, enabling complex real-time search queries by categories and tags.
- Created a seamless shopping cart management system with real-time price calculations and local storage data persistence.

Vite-Powered Programming Flashcards (*Web Application*)

- Created an interactive educational web app utilizing **React.js** and **Vite** for optimized assets bundling.
- Implemented client-side CRUD operations and built automatic synchronization with browser light/dark system themes.

OOP Architecture Task Dashboard (*Web Application*)

- Designed a lifestyle productivity dashboard built entirely on **Object-Oriented Programming (OOP)** paradigms.
- Encapsulated complex application state inside modular JavaScript Classes, ensuring complete separation of business logic and rendering.

WORK EXPERIENCE

Freelance & Independent Software Development | *Remote*

Frontend & React Native Engineer | **2025 – Present**

- Independently engineered and deployed 10 production-ready full-stack web and mobile projects using React/Next.js/TS.
- Integrated web interfaces with asynchronous backend systems using REST APIs, Fetch, and Mockapi architectures.
- Optimized frontend performance, asset delivery (converting media assets to high-efficiency WebP/MP4 formats), resulting in high Google Lighthouse performance scores.

Logistics & Manufacturing Sector | *Russia*

***Warehouse Manager & Construction Team Lead* | 7 Years of Experience**

- Promoted from entry-level worker to Team Lead and Warehouse Manager through demonstrating exceptional work ethic and reliability.
- Managed cross-functional teams, coordinated materials distribution, and optimized storage supply chains under high-pressure conditions.
- **Key Soft Skills Gained:** Advanced problem-solving, team leadership, crisis management, extreme resilience, and strong professional accountability.

EDUCATION

North Ossetian State University named after K.L. Khetagurov

Bachelor's Degree in Applied Mathematics and Systems Programming

- Deep academic training in exact sciences, algorithms, data structures, and foundational software engineering principles.
